1. Flower Silk Brocade Fabric

Brocade is the most elaborately woven fabric. It has a raised pattern and is woven with multi-coloured threads. Brocade produces rich designs and is the traditional jacquard fabric. It is generally heavy than other fabrics. Brocade is popularly used in fashion clothing and upholstery. Brocade is reserved for elegant decor and more dressy occasions and is often made from fabrics with a high sheen. Brocade drapes are elegant and formal. Extra care should be taken to make the Brocade fabric last longer.

2. Embroidery Dupion Silk Fabric

Silk is a natural fibre, which can be woven into textiles. The purest variety of silk is obtained from cocoons. The absorbency of silk makes it easy to be worn in warm weather and while working out. Moreover, its low conductivity keeps warm air close to the skin, during cold weather. Silk is extensively used in clothing such as shirts, ties, blouses, formal dresses, high fashion clothing, etc. Fabrics such as chiffon, taffeta, shantung, etc. are made from silk fibre.

3. Embroidery Chin on Fabric

Chiffon is a lightweight fabric that is made out of any synthetic material or silk fibers. It is a net type of fabric, which is translucent and soft to touch. To minimise the translucent effect of the fabric, several layers of chiffon are used in chiffon dresses. Chiffon fabric can be used in any garment and it brings elegance and style. Chiffon is a beautiful fabric in muted colours; it is a body-hugging fabric.y
